### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

Art Unit: 1657

Applicant's election without traverse of Group III, claims 38-54, in the reply filed on 9/1/11 is acknowledged.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 38-54 are rejected under 35 U.S.C. 102(b) as being anticipated by Poelstra.

Poelstra (6,290,952) entitled "Method of Dephosphorylating an Endotoxin in vivo with Alkaline Phosphatase" teaches in column 14 line 39 to end, pharmaceutical compositions with alkaline phosphatase activity used in a method where the composition is administered to treat pathology mediated by endotoxin.

All of the features of the claims are taught by Poelstra for the same function as claimed.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 38-54 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to

Art Unit: 1657

which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claims are directed to preventing and treating a plethora of disorders. The specification teaches an animal model for treating colitis by orally administering AP. This study does not extend to treating the disorders claimed by administering AP to any mucosal surface of any body cavity to treat such disorders as all LPS toxicity which reads on meningitis to septicemia. And no enablement is found for preventing any disorder.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 39 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 39 "the prevention or reduction" lacks definite antecedent basis. And "prophylaxis or treating" lacks antecedent basis and is inconsistent with claim 38 from which it depends.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Poelstra (WO 00/37943) teaches diagnosing sepsis by determining AP.

Millan (2010/0016313) teaches intestinal alkaline phosphatase modulators.

Velders (2010/0143323) teaches intestinal AP compositions.

Brands (2011/0142817) teaches AP to treat intestinal disorders.

Hodin (2011/0206654) teaches AP to treat intestinal flora.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RALPH GITOMER whose telephone number is (571)272-0916. The examiner can normally be reached on Monday - Friday.
